

Your maintenance work

Save money and time

Maintx – Efficient Maintenance Management Software

- Maintx is made by Maintsoft Ltd in Iceland. We are a software company focused on developing maintenance management solutions for vessels, machinery, facilities...
- Our mission is to make your maintenance work easier, more secure and efficient.
- Our software solution Maintx is a fully featured and ready for use platform for virtually any maintenance management.
- The solution helps you achieve easier control of your maintenance work, history and costs.
- Not having a comprehensive maintenance management system like Maintx can be very costly for your business in the long run.
- Equipment downtime, emergency repairs, overtime costs, spare part costs, and time spent preparing for audits can all affect your business bottom line to the worse.

Using Maintx you can change your maintenance operations from reactive to proactive. The solution reduces costs by helping you plan and schedule preventative maintenance, increase equipment life and reliability, and boost employee productivity.

Benefits At A Glance

- Maintx controls costs by preventing emergency repairs, reducing unnecessary spare parts inventory, and improving the use of labor resources
- Maintx ensures regulatory compliance by consistently including safety and precautionary steps in work order procedures
- Maintx assures quality by keeping assets in best possible working operating condition
- Maintx generates preventative maintenance work orders designed to keep your equipment up and running and extend the life of your operating assets.

Studies have show that implementing maintenance management software can help organizations save 15 - 30% of their maintenance budgets. Depending on the size and operating characteristics of your organization, this could translate into very high annual savings.
